 No.17, Aralliya Uyana, North Lake Round, Kurunegala

SUMMARY

Motivated 3rd-year Software Engineering undergraduate (GPA 3.59) skilled in **full-stack development**, **mobile apps**, and **OOP**. Strong understanding of the **SDLC**, **MVC architecture**, **web technologies**, and API integration. Experienced in Agile teamwork, debugging, and testing, with a passion for building **scalable**, **user-focused applications** in collaborative environments.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, C, C++, Python

Frameworks & Development: React.js, MERN Stack, Spring Boot, React Native, HTML, CSS, Kotlin, Android Studio, Visual Studio Code, Firebase, Expo, REST APIs

Databases & DevOps Tools: MongoDB, Firebase Firestore, MySQL, Git, GitHub, JIRA, Vitest, Playwright, Docker, Kubernetes, Vercel

Core Concepts: OOP, Data Structures, Algorithms, API Integration, Debugging, Code Optimization, Software Documentation, Agile/Scrum, CI/CD, Software Architecture

EDUCATION

Higher Education

2023 - 2027

[Sri Lanka Institute of Information Technology, Malabe](#) - BSc (Hons) in IT specialization in Software Engineering
Current Undergraduate (Cumulative **GPA – 3.59**)

G.C.E. Advanced Level

2022/23

[Maliyadeva Girls College, Kurunegala](#)

Physical Science Stream

G.C.E. Ordinary Level

2019

[Maliyadeva Girls College, Kurunegala](#)

7As and 2Bs

PROJECTS

Healthcare Platform (Mediconnect) – Team Project

- Developed a full-stack healthcare platform with role-based workflows, appointment booking, telemedicine sessions, notifications, payment processing, and scalable **microservices architecture**
 - Implemented Doctor and Telemedicine services with REST APIs, including profile management, availability control, patient data access, session lifecycle management, real-time video/audio integration, and secure authentication
- Tech:** MERN Stack, REST APIs, JWT, Agora SDK, Docker, Kubernetes

Agriculture Management Platform (AgroFund) – Team Project

- Developed a full-stack agriculture platform for user management, loan processing, repayments, courses, weather updates, and admin operations; implemented **unit, integration, and performance testing**
 - Implemented loan module with eligibility validation, EMI calculations, repayment handling, and secure role-based APIs; tested using Jest, Supertest, and Artillery
- Tech:** MERN Stack, JWT, Jest, Supertest, Artillery, Vercel

RebuildHub – Team Project

- Developed a mobile app for crowdsourced disaster damage reporting with real-time map visualization, location tracking, and aid request features using **Agile/SCRUM** methodology
- Designed and implemented a Live Damage Heatmap with clustered markers and severity-based visualization
Tech: React Native, Firebase, Google Maps API, Expo, JIRA

EcoWaste – Team Project

- Built a waste management web platform supporting waste scheduling, user requests, payment processing, and collection tracking
- Implemented special waste management module with scheduling, payments, and tracking features
Tech: React.js, Spring Boot, MongoDB

Personal Finance Tracker(MoneyMind) – Individual Project

- Developed an Android app to track income and expenses with category-based analysis, budget management, and dynamic progress tracking
Tech: Kotlin, XML, Android Studio, SQLite, Room

Street Food Finder (Street Bites) – Individual Project

- Created a mobile app to browse street food stalls with categorized listings and detailed views using a CardView-based UI
Tech: Kotlin, XML, Android Studio

FixItNow – Team Project

- Developed a full-stack repair services marketplace enabling service booking, product listing, and order management
- Implemented product management module including CRUD operations, inventory tracking, and delivery management
Tech: MERN Stack (MongoDB, Express.js, React.js, Node.js)

LEADERSHIP EXPERIENCE

- Led two academic software engineering teams of 5 members each, including a multilingual team (Sinhala & Tamil), ensuring effective communication and collaboration
- Coordinated tasks and team communication to reduce misunderstandings and ensure timely project delivery

AWARDS AND CERTIFICATES

Dean's List Award, 1st & 2nd Semester - *Awarded for achieving GPA above 3.7*

SLIIT,2023–2024

MongoDB JAVA Developer path certificate
